

Actility Webinar

Air Quality Monitoring for Indoor Environment & Covid 19

Improving productivity & Safety using IoT, by Zenner, DataCake and Actility.

Tuesday January 17th

15:00 CET Paris

Introduction

Shmuel Solomon

The importance of Indoor Air Quality

- We spend **90%** of our time in indoors environments
- IAQ has a measurable impact on **cognitive performance**
- **Poor IAQ is harmful**, particularly to those suffering chronic respiratory and/or cardiovascular diseases, and of course may be used as a **proxy for COVID-19 transmission**
- We solve this through Technology – **simple to install, operate, and affordable**

Webinar Introduction

Today's speakers:

Shmuel Solomon

Your Partner For Digital Transformation -

Webinar Meeting Agenda

- Introduction – **Shmuel**
- Why Indoor Air Quality Solution? – **Shmuel**
- The Indoor Air Quality Solution – **Shmuel**
- Example use cases – **Boris**
- The ZENNER CO2 Indicator Sensor – **Boris**
- Actility Speeds Up Digital Transformation – **Shmuel**
- An intuitive application by Datacake - **Simon**
- The Indoor Air Quality Solution Live Demo- **Simon**
- Q&A

Why Indoor Air Quality Solution?

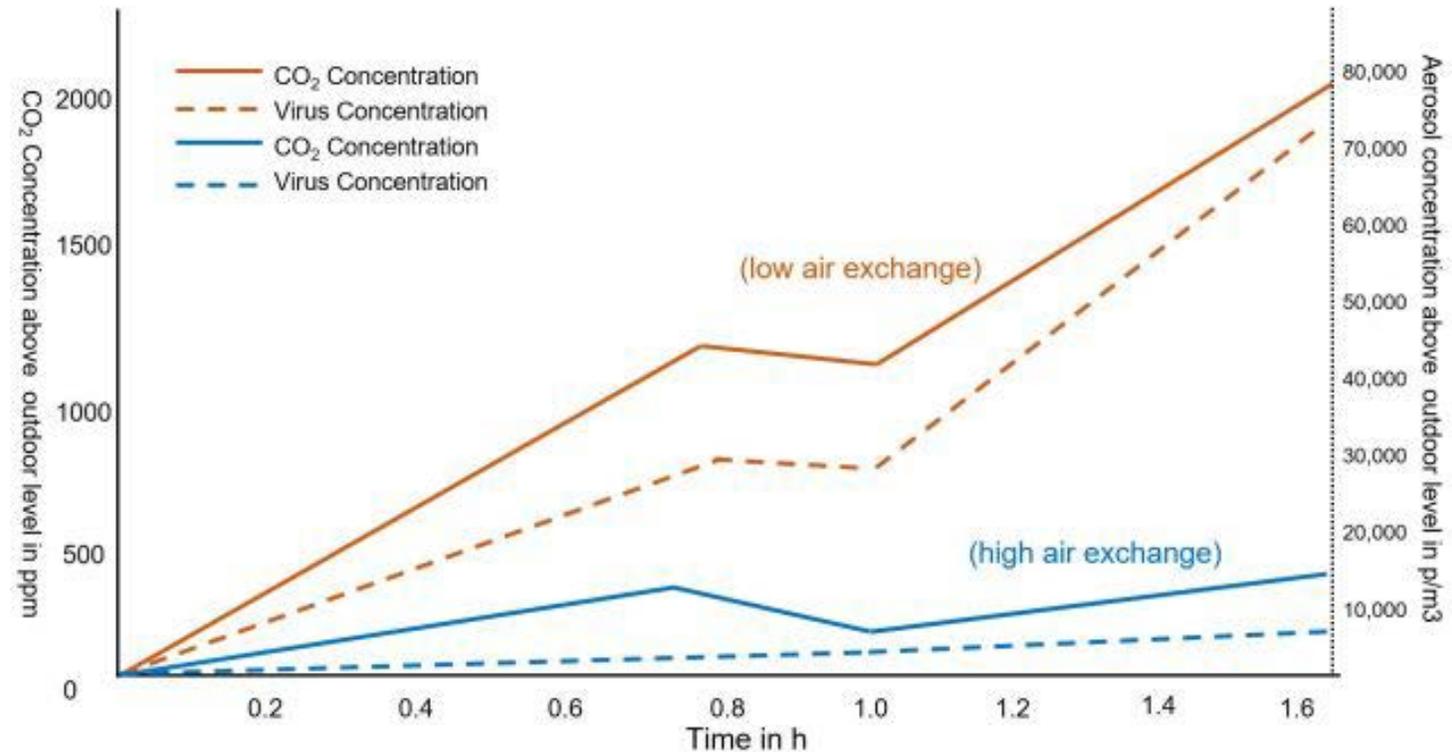

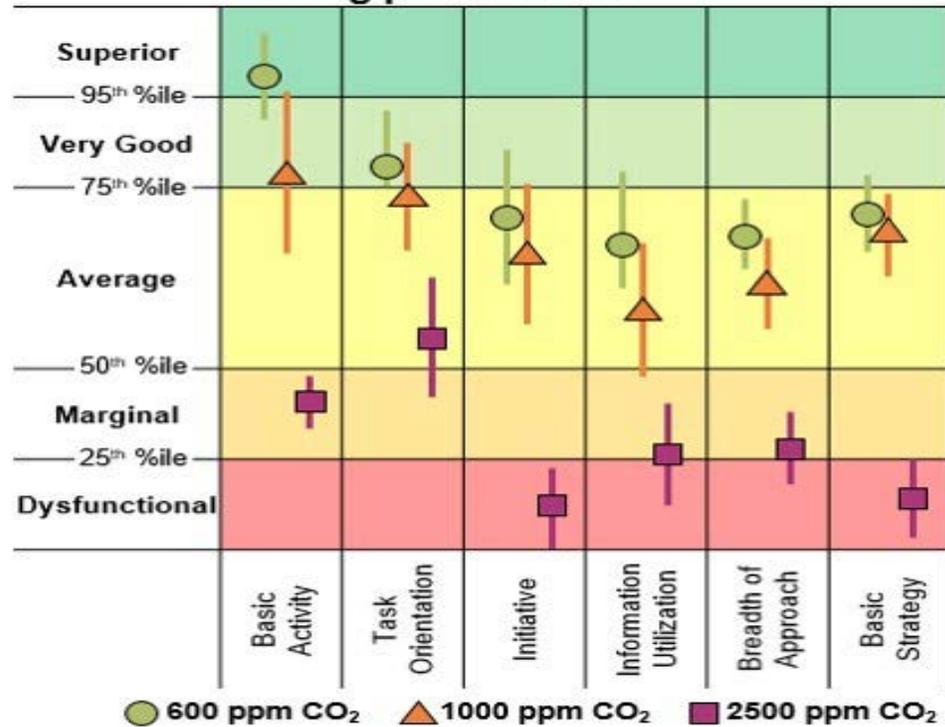

Shmuel Solomon

CO₂ – Fundamentals

CO₂ measurement is an economical system that **allows to know if the chosen ventilation system is sufficient** or not. The maximum recommended value of CO₂ will depend on the room, its occupation and the activity carried out. In general, studies shows that the risk of contagion rises a lot when the value of CO₂ concentration is doubled (approximately 420 ppm).

Impact of CO₂ on human decision making performance

**For more safety and
perfect air quality**

ZENNER

ZENNER CO₂
INDICATOR
for LoRaWAN®

Measures the CO₂ concentration
in real time

A person's hand is shown hovering over a laptop keyboard, suggesting a gesture-based control system. In the foreground, a small white air quality monitor displays '800' and 'CO2' on its screen. The background is a blurred office setting.

ZENNER

For perfect working conditions

A close-up photograph of a person's hand, wearing a white lab coat sleeve, pulling a silver metal door handle. The hand is positioned on the left side of the frame, and the handle is a horizontal bar with a rectangular grip. The background is a blurred white wall with a dark square vent. The overall color palette is cool, with blues and greys.

ZENNER

and aeration as required

ZENNER

For integration into LoRaWAN® networks...

ZENNER

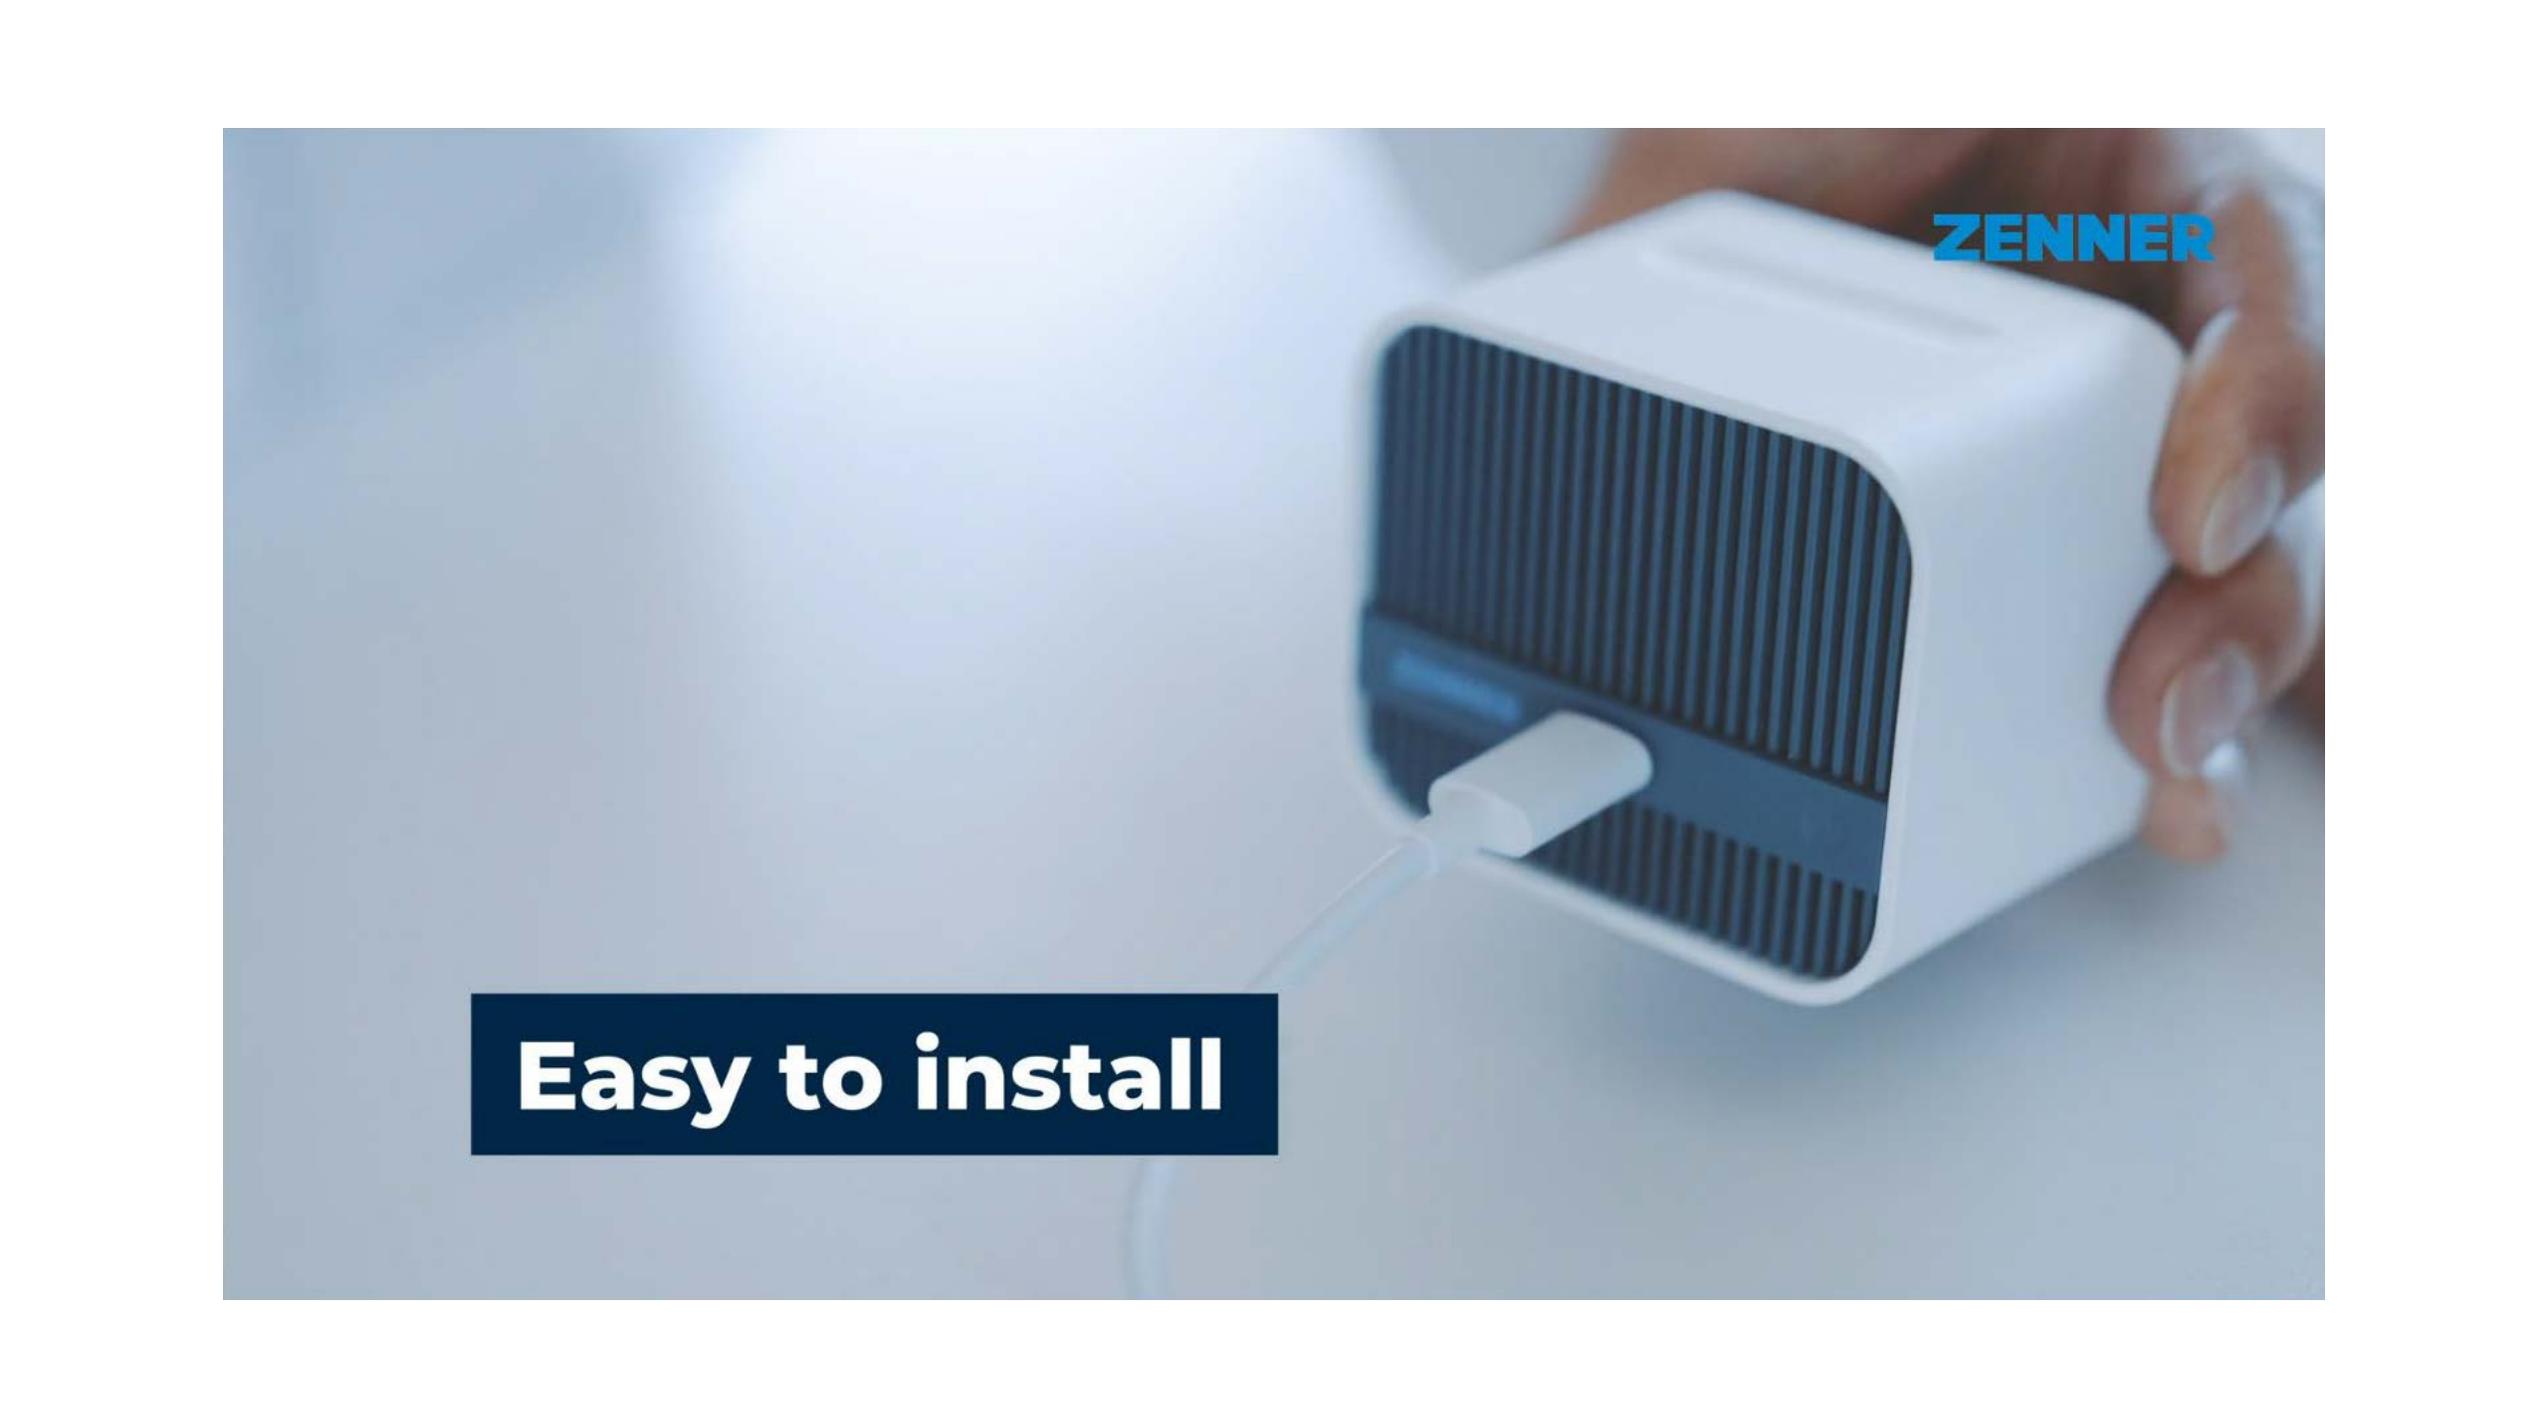

...or stand-alone operation

ZENNER

Easy to install

A close-up photograph of a hand holding a white, cube-shaped portable speaker. The speaker has a black grille on its front face. A white USB-C cable is plugged into the bottom of the device. The background is a plain, light-colored surface.

ZENNER

Easy to install

ZENNER

Smart CO₂ monitoring

LoRaWAN Signal Strength indicator.
Flashes when send joining request

Colored LED PPM Indicator

Range (ex works)	Evaluation	LED Farbe
< 800ppm	normal	green
800 - 999ppm	slightly increased	yellow
1.000 - 1.399ppm	high	purple
> 1.399ppm	very high	red

The measuring ranges can be set individually via LoRaWAN[®] downlink.

Battery Status

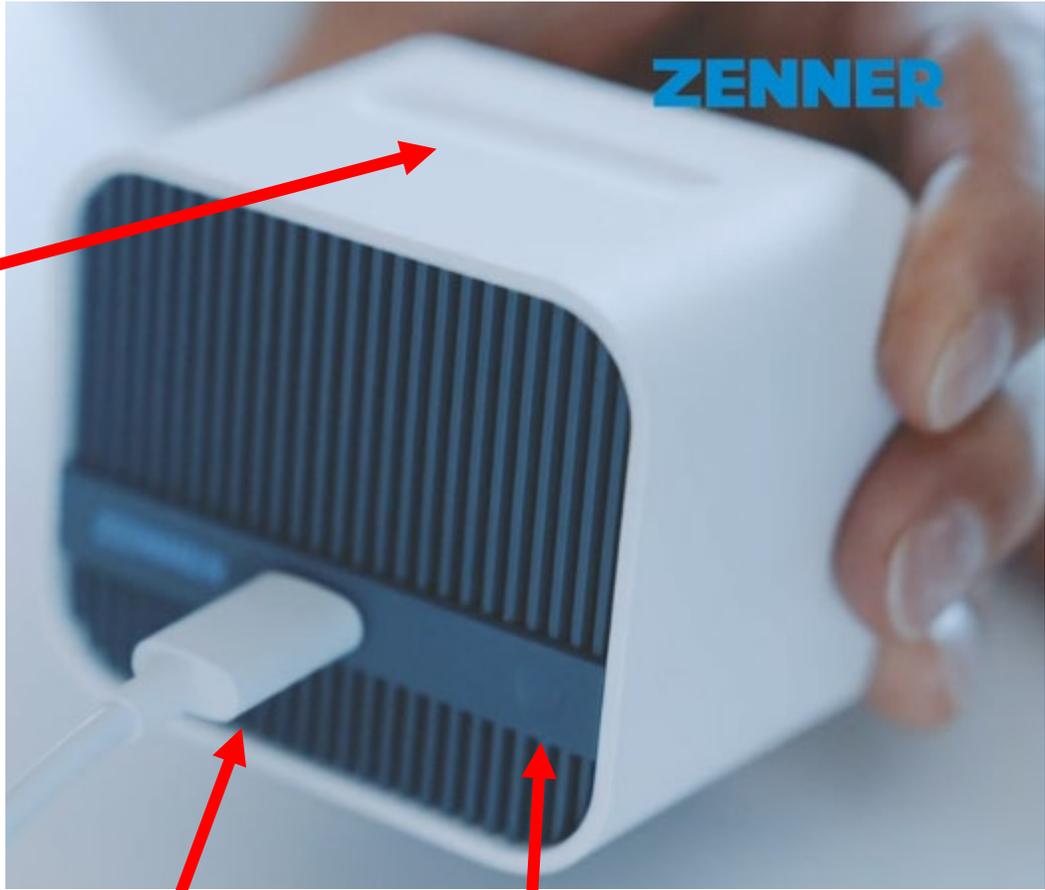

CO2 PPM in real time

Last up to 12 hours in

Energy Saving Mode when the device is being operated via the integrated battery, the display automatically switches off after 4 minutes without operation.

This saves energy and achieves a longer battery life.

The CO2 concentration can always be checked on the LED indicator during this time

Switch for re-setting
sensor LoRaWAN
Connection

or Calibration

USB-C

Power on/off

- The sensor measures several times per minute and stores the current CO2 value in ppm
- After 45 minutes, the sensor sends the last three stored CO2 values via LoRaWAN®-values.
- If the measuring range is exceeded, the battery is too low or a hardware fault is detected, the sensor immediately sends a status packet.
- Historical data can be viewed and limit values set via the respective IoT platform
- Limit values can be set.

Actility - Speeds Up Digital Transformation

Shmuel Solomon

Actility

In Short

- ✓ Actility is a **world leader** in LPWAN industrial-grade **connectivity solutions** for the IoT.
- ✓ Also provides revolutionary **ultra-low TCO geolocation technologies** through its subsidiary **Abeeway**.
- ✓ Headquarters – **Paris, France / Worldwide regional offices**.
- ✓ Founded – **2010**, Employees – **130**. **60% R&D and Product Managers**.

Mission

- ✓ Actility believes in a more efficient and sustainable world through **ubiquitous digital-twin technology**. We want to spark this transition and become the **leading global mediation** platform between cloud apps & physical world by 2023.
- ✓ Actility's ambition is to **put IoT at the service** of cities, citizens, industries, and communities, enabling them to **form a connected ecosystem**.

Wireless connectivity choices before LoRaWAN[®]

Wired

Costs & delays: only for high-end & core systems

- ...costs \$6 to \$8 per running foot
- ...takes time
- ...is costly to maintain & troubleshoot

WiFi

2.4GHz has poor wall penetration & coverage + no support for macro-diversity. Suitable only for fixed-powered sensors under WiFi coverage (indoor office areas)

Legacy sub-GHz RF (e.g. wMbus)

Limited ecosystem, metering centric. Older generation RF layer with fixed data rate, lack of macro diversity, limited sensitivity which makes it hard to avoid dead-spots. Limited adoption also means higher prices.

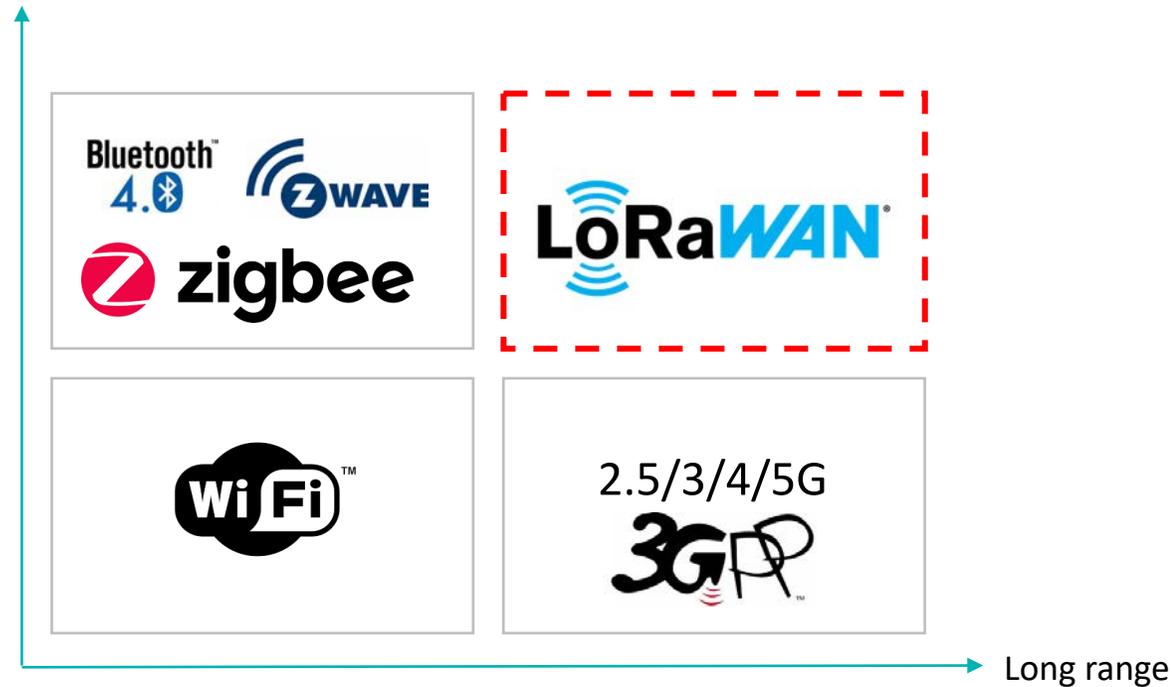

Mesh (WirelessHART)

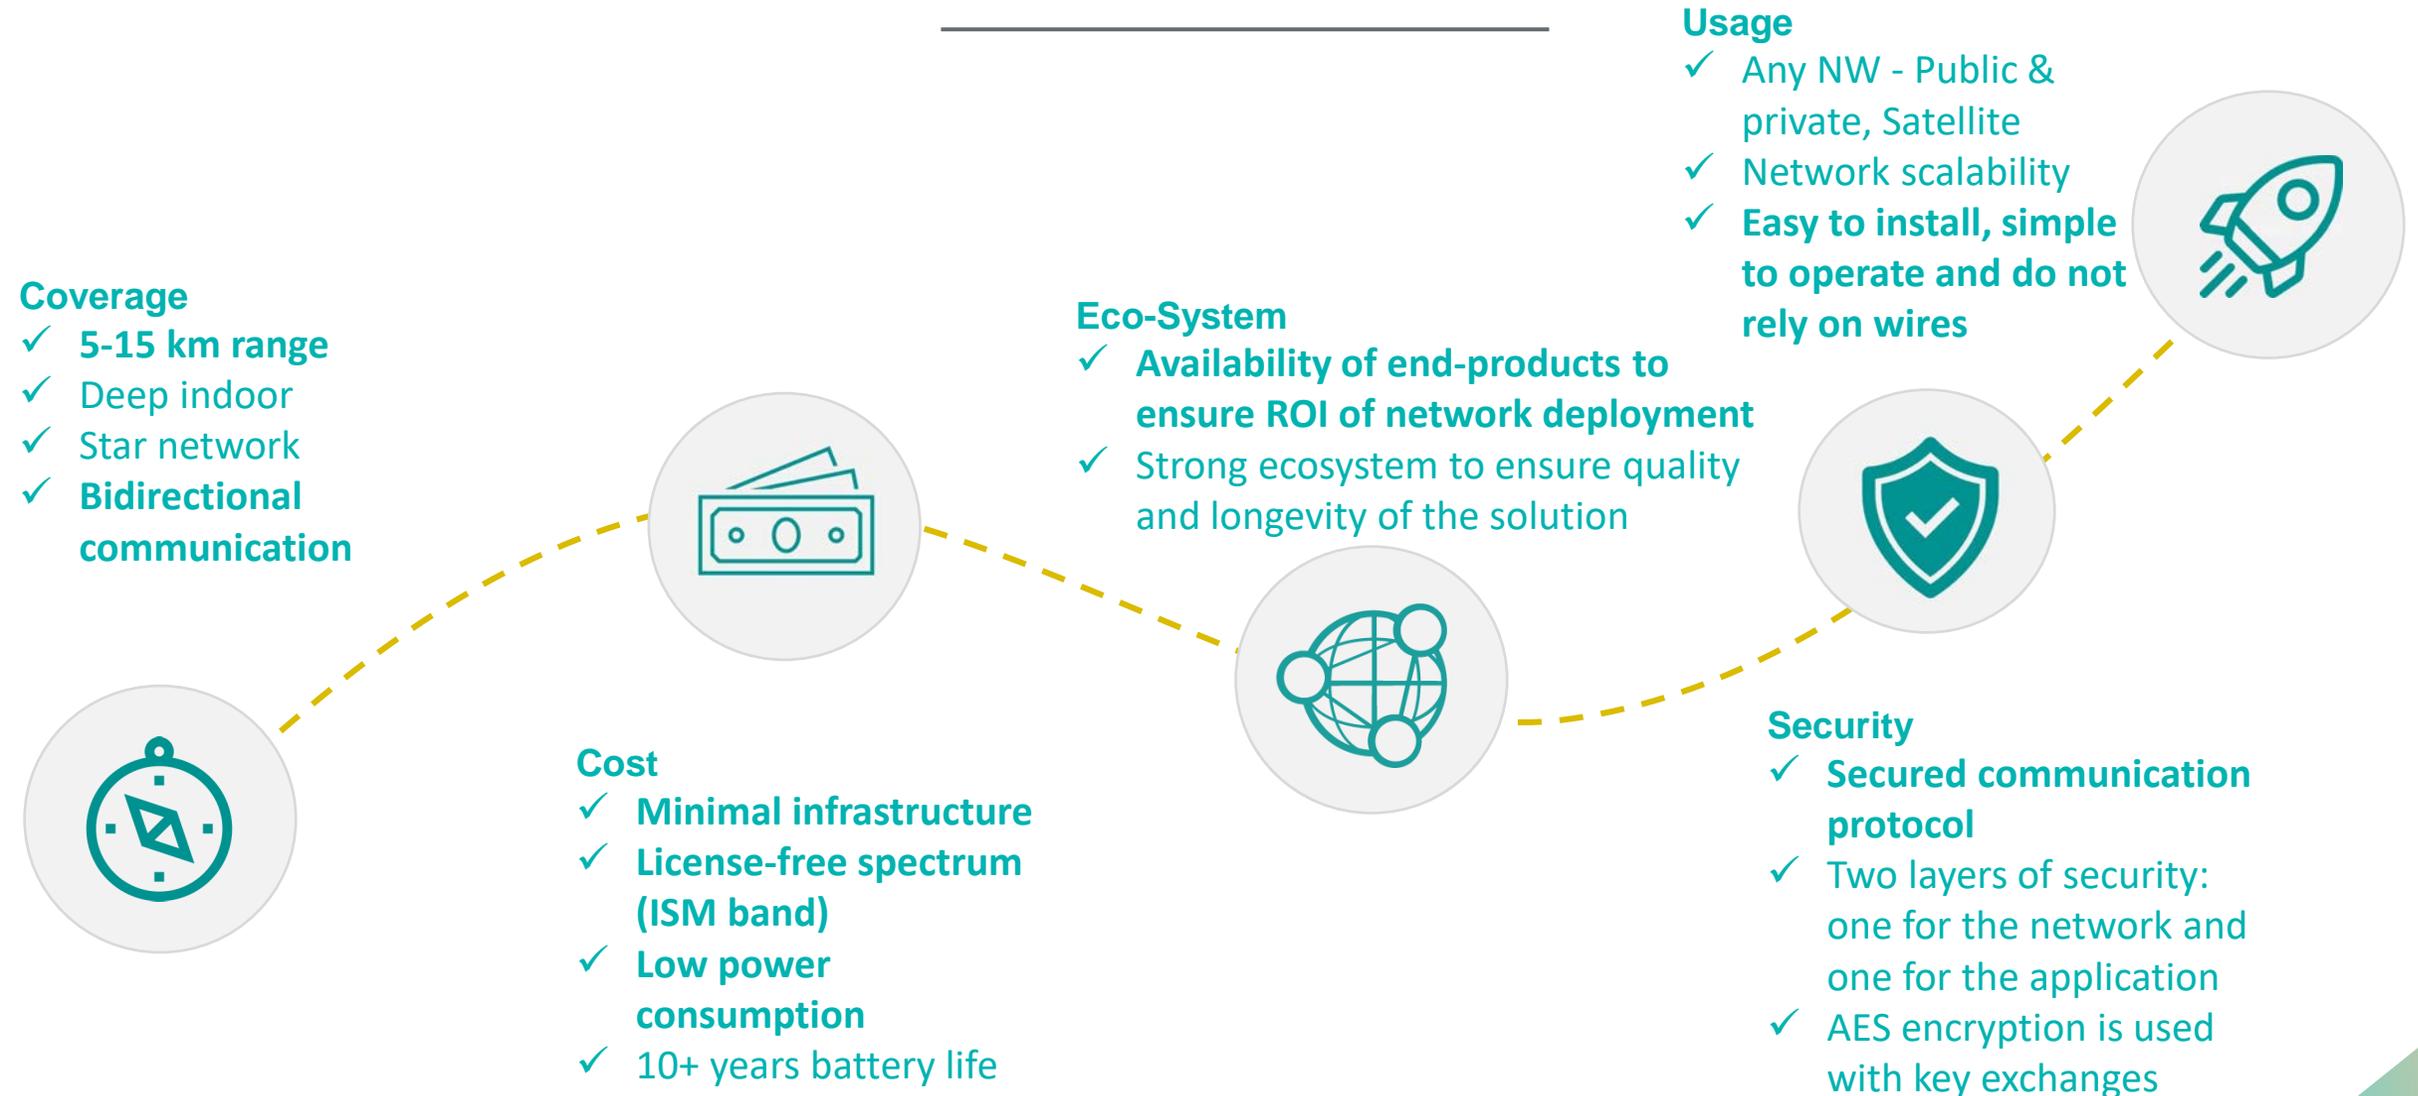

Suitable for fixed indoor assets only: meshed networks relay positions are engineered to reach fixed devices

Low-Power & Long-Range

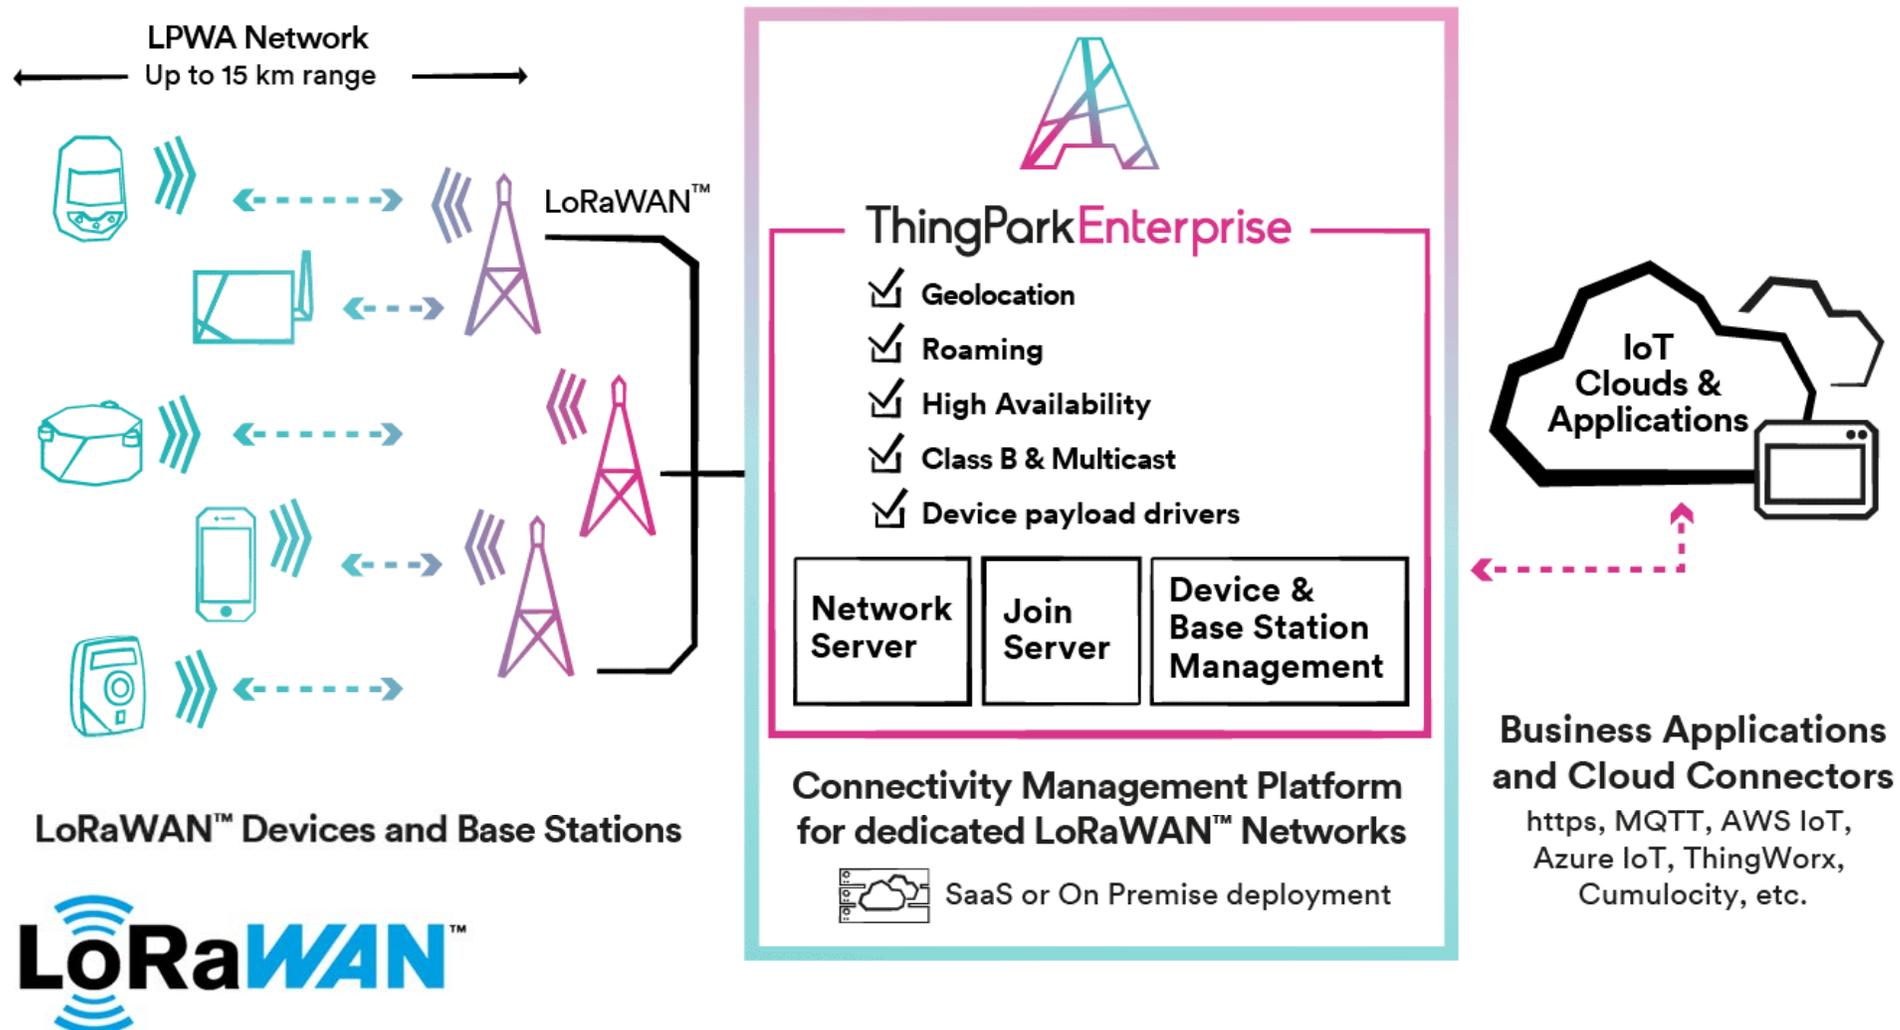

Low power/
Low data rate

LoRaWAN – A Leading Choice For Indoor Air Quality

ThingPark Enterprise powers industrial grade LoRaWAN™ Networks

Datacake

Datacake is a multi-purpose, low-code IoT platform that requires no programming skills and minimal time to create custom IoT applications that can be brought into a white label IoT solution at the push of a button.

- ✓ Low Code IoT Platform
- ✓ 12k Users in 30+ Countries
- ✓ Among the Top 10 IoT platforms

The image displays two overlapping screenshots of the Datacake IoT dashboard. The background screenshot shows a dashboard for 'Feinstaub-Messung' (Fine Dust Measurement) with the following data:

- Air Quality:** Air Pollution Level at 85% (5 minutes ago).
- Fine Dust Values:** PM2.5 at 106 µg/m3 (5 minutes ago).
- Ventilation Required:** No (5 minutes ago).
- Daily Average:** 71 µg/m3 (5 minutes ago).
- Daily Trend:** A line chart showing PM10 and PM2.5 levels over time from 6.2.2022 to 7.2.2022.

The foreground screenshot shows a dashboard for 'Notecard Asset T...' with the following data:

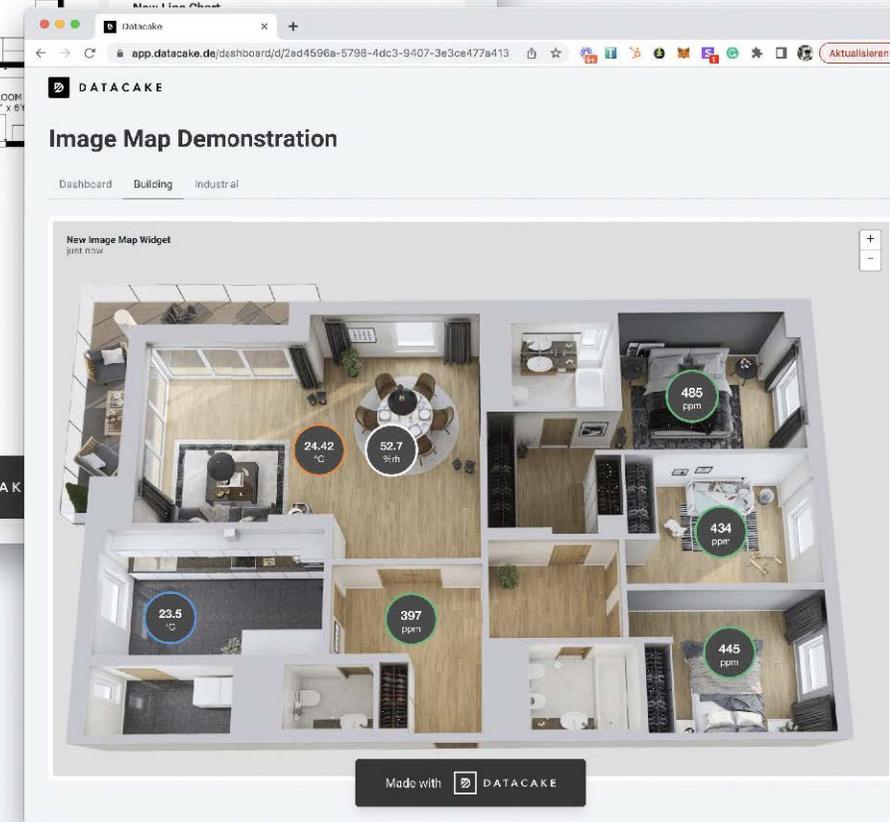

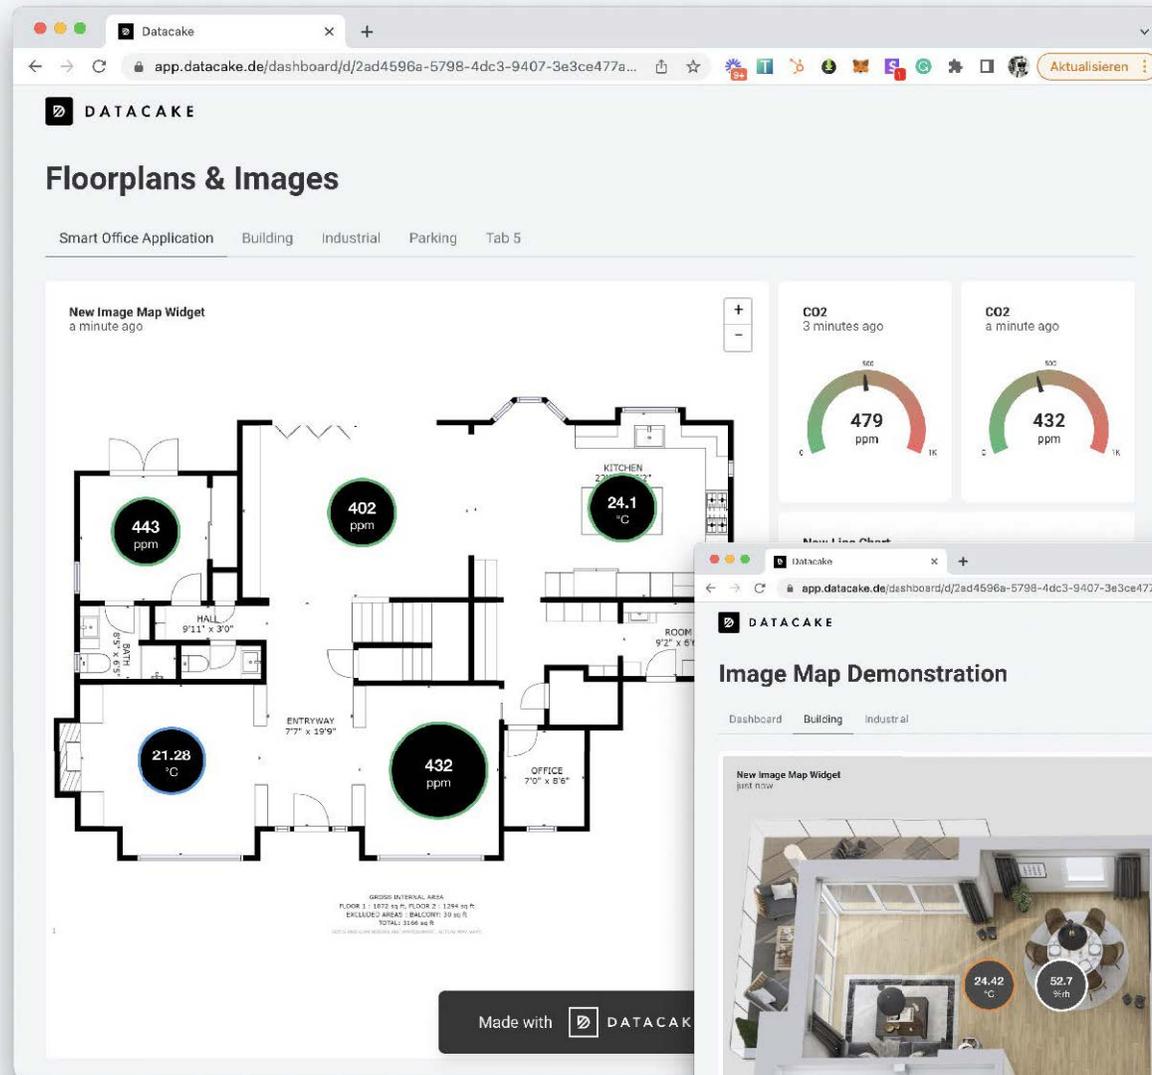

- Temperature:** 5.19 °C (16 minutes ago).
- Humidity:** 10% (16 minutes ago).

Both screenshots show a sidebar menu with options like 'Devices', 'Reports', 'Gateways', 'Cake Red', 'Members', 'Rules', 'Workspace', 'Integrations', 'White Label', and 'Billing'. The 'airnote' logo is visible on the physical device shown in the bottom right corner of the foreground screenshot.

Build IoT Indoor CO2 Monitoring Solutions

With the Datacake platform you get a complete visualization and customer management tool for your business. Fully compatible with the Actility LNS and Zenner CO2 sensors, it offers you a perfect start into indoor IoT CO2 monitoring.

- ✔ Upload custom building floor plans
- ✔ SMS and email alert for critical values
- ✔ Customer and building management
- ✔ Create and share dashboards for your customers

ZENNER CO2 INDICATOR L868 ID A for LoRaWAN®

The ZENNER CO₂ INDICATOR is a compact indoor LoRaWAN® radio sensor (868MHz) for measuring the CO₂ content of indoor air. This product uses the photoacoustic principle to detect the CO₂ concentration (ppm) in real time, enabling more efficient ventilation behaviour and faster response time. With the integrated display and the colour-changing LED display, the sensor always provides real-time information about the current CO₂ value, the battery level and the status of the LoRaWAN® connection. An optimal stationary and mobile companion in the company, at the workplace, in the meeting room at a meeting or in the canteen. It can be placed on any flat surface. In addition, the device can also be used "stand alone", i.e. without a LoRaWAN® connection, e.g. at a meeting outside the company, when visiting a customer or a restaurant outside the range of the LoRaWAN® network. Without LoRaWAN® connection, however, no remote monitoring or alarming can take place. The CO₂ limits can be set individually by radio command (downlink). The device can be operated with the integrated rechargeable battery or permanently powered by a standard USB-A power supply unit 5V. Please note that only the USB-A to USB-C charging cable is included, a power supply unit is also required.

NOW NEW OPTIONAL with ZENNER IoT PLUG&PLAY:

Simply select the ZENNER IoT PLUG&PLAY Option by clicking on the selection box. Selecting the function ensures that your purchased ZENNER CO₂ Indicator is directly created in the M2C LoRaWAN®-Netz EUROPE and automatically added to your B.One Gallery visualisation platform. Without manual configuration, setup and authentication. Prerequisite for visualisation: You already have a ZENNER IoT GatewayPLUS SMART, ZENNER IoT GatewayPLUS Indoor or Outdoor with the IoT PLUG&PLAY Option selected in uses.

Order, plug in, switch on and view the sensor data in your B.One Gallery. See the measurement data, actions and progressions of your sensor directly there. Design and view your graphics, charts and reports. Create graphical reports of your data and share them with your colleagues, partners, customers or service providers simply via WebLink. The reports can be updated and the recipients only need a web browser.

NOW NEW also available and expandable within the Actility ZENNER DataCake Starterkit on ThingPARK.

Product Features

- Modern design
- Display with CO₂ indication (ppm) as well as quality of LoRaWAN connection and battery status
- LED traffic light
- Integrated battery
- Configuration Over the Air (OTA)

Evaluation of the CO₂ measured values

Range (ex works)	Evaluation	LED Farbe
< 800ppm	normal	green
800 - 999ppm	slightly increased	yellow
1.000 - 1.399ppm	high	purple
> 1.399ppm	very high	red

The measuring ranges can be set individually via LoRaWAN[®] downlink.

Specifications

Model	CO2 INDICATOR L868 ID A
Weight	115g
Size	63,6 x 46,0 x 54,6mm
Display Size	59,9 x 49,9mm
LoRaWAN [®]	Klasse A
Frequency	863 - 870MHz
Transmit Power	max. 14dBm
Battery	2.000mAh
Power Input	5V= 1A (Hinweis: im Lieferumfang ist kein Netzteil enthalten)
Operating Temperature	0 - 40°C
Operating Humidity	0 - 99%rH (nicht kondensierende Umgebung)
CO ₂ Measuring Range	400 - 9.999ppm
Accuracy of	400 - 2.000ppm --> ±50ppm
Accuracy of	2.000 - 9.999ppm --> no guarantee
