Abeeway

Watch on  YouTube

# Agenda

---

- Introduction
- Enhanced Miner Safety in Peru: Integrating IoT and Private LoRaWAN Network Technology at Mina Justa – **StraconTech**
- NCL's 'Suraksha Kavach' for Enhanced Worker Safety in Indian Coal Mines – **Syook**
- Production Increase in an Open-Pit Mine in Turkey: A Case Study in Digital Mining with Machine learning, IoT and LoRaWAN – **Tingz**
- Asset tracking in hazardous environments with Abeeway trackers - **Abeeway**

# Introduction

# Connected Mining IoT Global Forecast

# Key IoT uses cases for mining industry

**Asset Tracking and Management**

**Safety Monitoring**

**Predictive Maintenance**

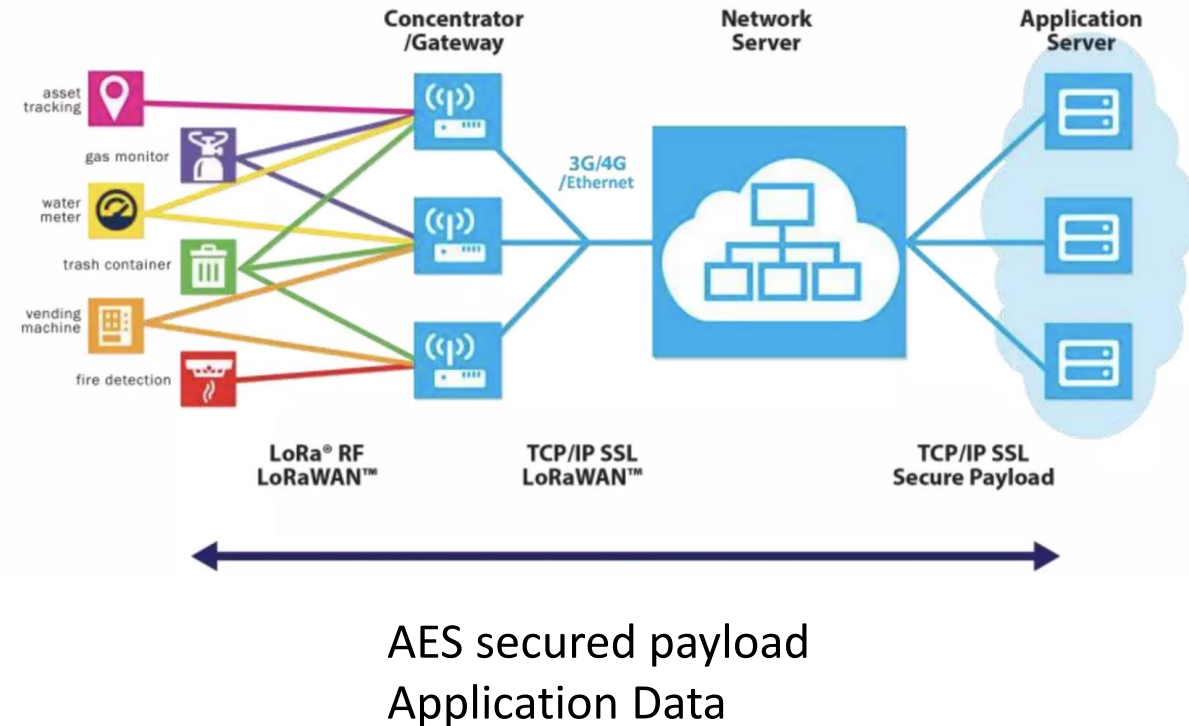

**Remote Operations and Automation**

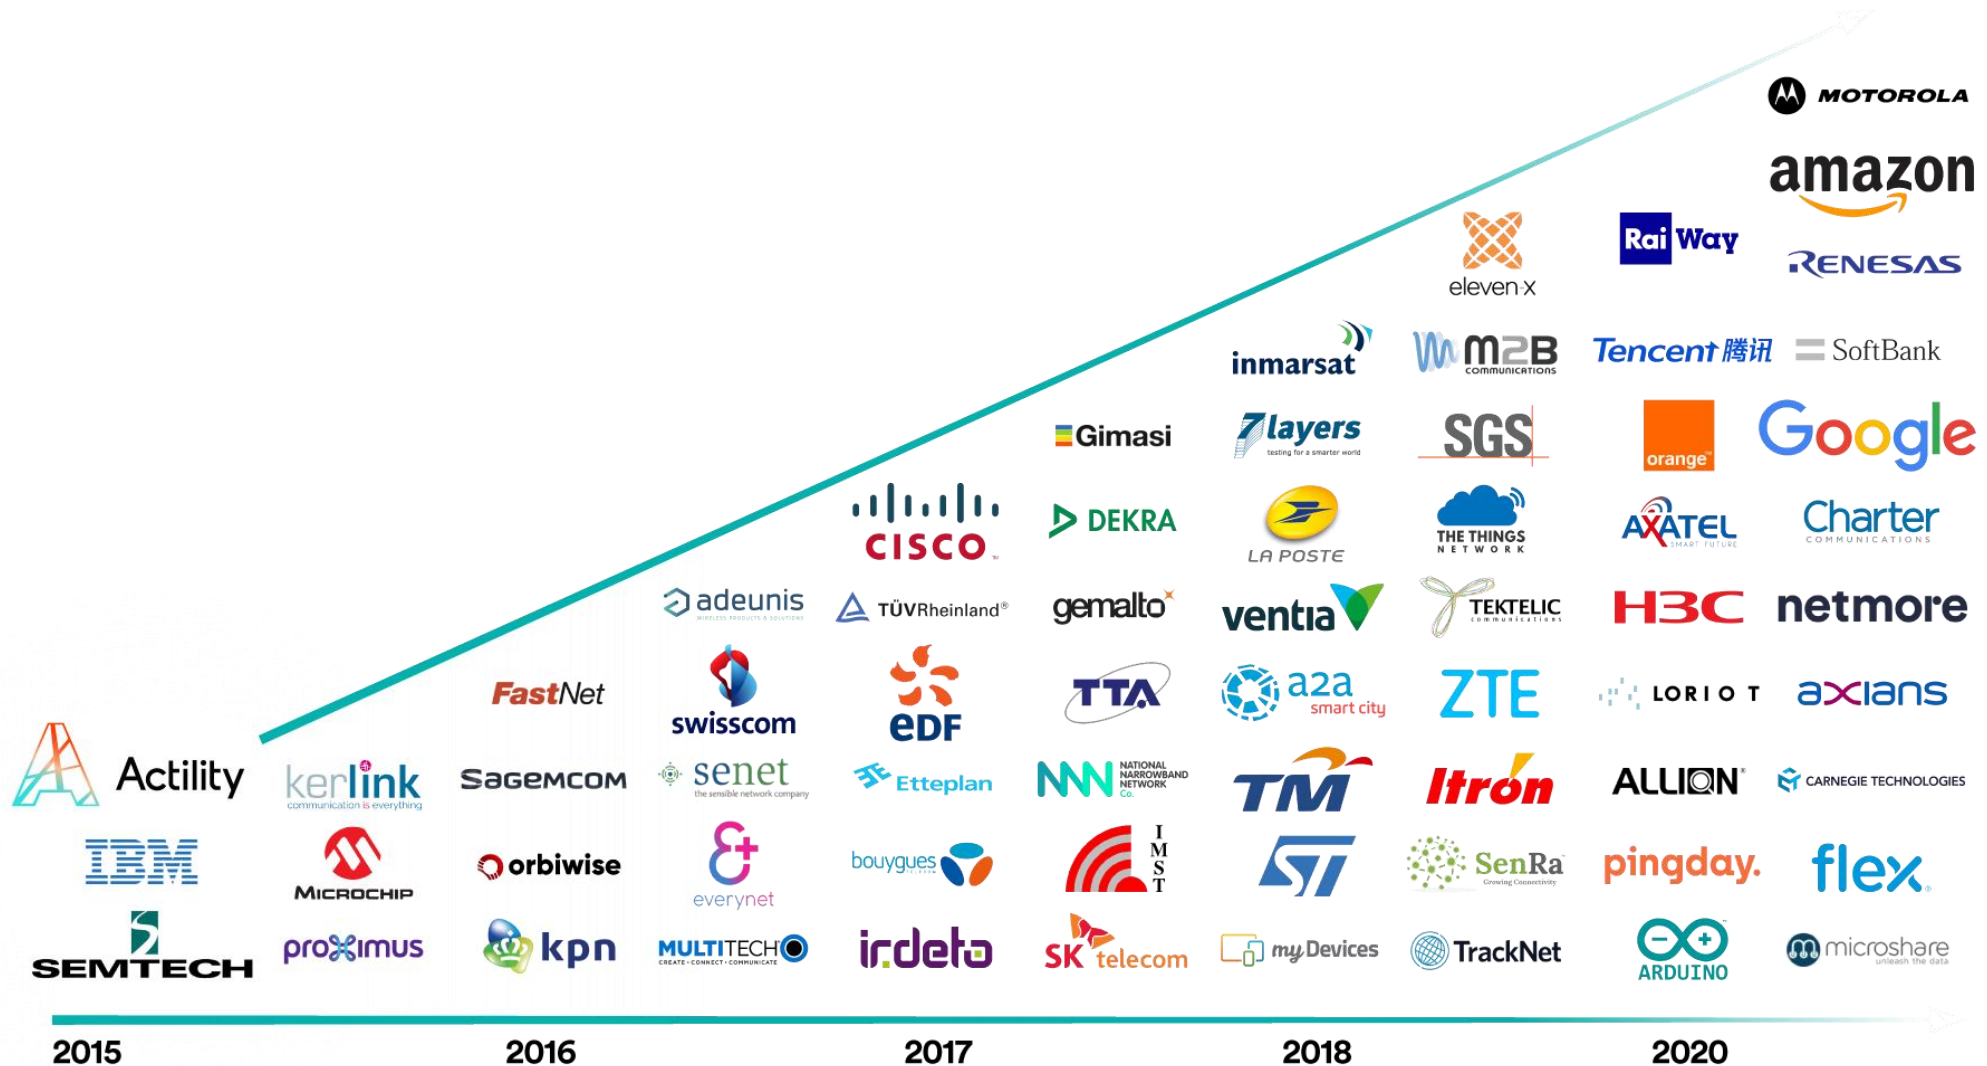

# What is LoRaWAN?

- The LoRaWAN specification is a Low Power Wide Area (LPWA) network designed for:
  - Low power battery operated devices
  - End-to-end security
  - Private IoT network deployment in ISM bands
  - Roaming across public and private networks
  - localization

# Actility is a founding member of the LoRa Alliance™

# Why LoRaWAN?

---

- It provides an open standard for IoT networks
- Flexibility of network deployment
  - Deploy your own private LoRaWAN networks
  - Leverage existing public LoRaWAN network
- Battery lifetime of upto 15 years when communicating once per day
- Security: The LoRaWAN specification uses 128-bit AES algorithm for end-to-end encryption
- Rich ecosystem of devices, manufacturers and application providers
- Supported by both community and Tier-1 companies

# Why do we need ATEX/IECEX certification for mining (1/2)

---

- 1. Safety Compliance:** ATEX (EU) and IECEx (International) certifications ensure that equipment used in mining operations meets stringent safety standards to prevent the risk of explosions and fires in hazardous environments.
- 2. Legal Requirements:** Many countries have regulations mandating the use of ATEX/IECEX certified equipment in mining sites to comply with safety standards and regulations. Failure to comply can result in fines, legal liabilities, and operational disruptions.
- 3. Risk Mitigation:** ATEX/IECEX certified equipment is specifically designed and tested to mitigate the risks associated with potentially explosive atmospheres commonly found in mining environments, such as flammable gases, vapors, and dust.
- 4. Worker Safety:** Certification ensures that mining equipment is safe for use by personnel working in potentially hazardous conditions, reducing the risk of accidents, injuries, and fatalities.
- 5. Product Reliability:** Certified equipment undergoes rigorous testing to ensure its reliability and performance in harsh mining environments, minimizing the risk of equipment failure and downtime.

## Why do we need ATEX/IECEX certification for mining (2/2)

---

- 6. Global Acceptance:** IECEx certification provides global recognition and acceptance, allowing mining companies to deploy equipment across different regions without the need for additional certifications or approvals.
- 7. Insurance Requirements:** Some insurance providers may require ATEX/IECEX certified equipment as a condition for coverage, recognizing the reduced risk associated with certified products.
- 8. Customer Confidence:** Certification demonstrates a commitment to safety and quality, enhancing trust and confidence among stakeholders, including employees, customers, investors, and regulatory authorities.
- 9. Cost Savings:** While initially, ATEX/IECEX certified equipment may involve higher upfront costs, it can lead to long-term cost savings by minimizing the risk of accidents, injuries, equipment damage, and regulatory non-compliance.
- 10. Environmental Protection:** ATEX/IECEX certification not only ensures the safety of personnel but also helps protect the environment by reducing the risk of pollution and ecosystem damage resulting from accidents in mining operations.

# TRACKING OF PEOPLE IN THE BLASTING AREA

Safety in the evacuation process

PROBLEMATIC **+29%**

Accidents in mines are caused by  
BLASTINGS AND LANDSLIDES

## OUR TRACKING SOLUTION

Our **People Tracking solution** will significantly improve worker safety by monitoring and alerting personnel entering the blasting area, **reducing the risk of accidents.**

In addition, this system allows **real-time monitoring of personnel**, generating alerts before entering rigid zones and making informed decisions by having historical information on the movement of workers, contractors and visitors.

Increased workers safety

Real-time monitoring

Increased efficiency and control

Informed decisions

Reduction of accidents

Real-time monitoring

## LORAWAN CHARACTERISTICS

**Secure bi-directional** connections through end-to-end encryption.

**Low power consumption**  
(battery life up to 10 years)

**Long communication range** (10 - 30 km).

**Connection** of large amounts of sensors and equipment to public or private networks.

**Low data rates.**

**Low transmission frequency (ISM)**

**Interoperability** of various LoRaWAN networks worldwide.

## BASIC COMPONENTS

### DEVICES

#### LoraWAN Gateway

- Large coverage per Antenna (10-30 Km typical)
- Cost effective per area covered, ideal for open pit mining
- Reduced bandwidth for greater tag battery savings
- Redundancy by design, all cells listen at the same time
- Network Server resolves duplicity of packets sent by cells
- High security standards with AES 128 encryption

## BASIC COMPONENTS

### DEVICES

#### Tags

- Fully sealed equipment with IP67 degree of protection.
- Manufactured from high impact resistant polymer
- Electronic components with industrial specifications that allow work in an extended range of temperature (certification for temperature and humidity).
- Reduced size and weight, facilitating transport, storage and daily use is not uncomfortable.
- Low power consumption guarantees long life of the rechargeable battery.
- Cost effective equipment that allows massive utilization in each mining company.

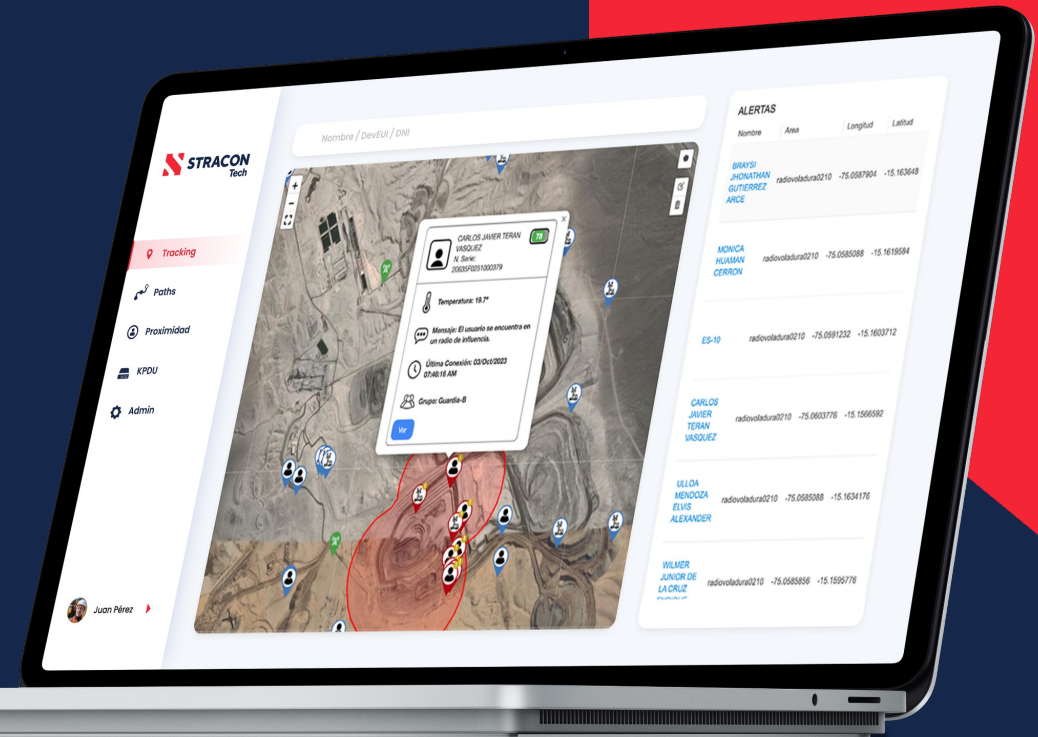

## BASIC COMPONENTS

### PLATAFORM

#### Software ST-Track

- Geographic Information System (GIS)
- Mine map display
- Real-time display on the map of tracker devices that are associated with each person.
- Definition of points of interest (POIs) such as entrances, exits, communication towers.
- Definition of Zones of Interest to count people for each defined zone and totalize.
- Association of devices per person.
- Definition of authorizations by Zone.
- Alarms for entry into unauthorized areas.
- Real-time counting by defined Zone and totalization within the coverage area.

## BASIC COMPONENTS

### LNS

#### Thingpark SAAS

- Service 100% managed by Actility
- Virtually unlimited scaling possibilities
- Decoding of many devices in a very easy way thanks to the repository available.
- Compatibility with many Gateway manufacturers available in the market.
- Possibility of working in SAAS or OnPremise depending on the need.

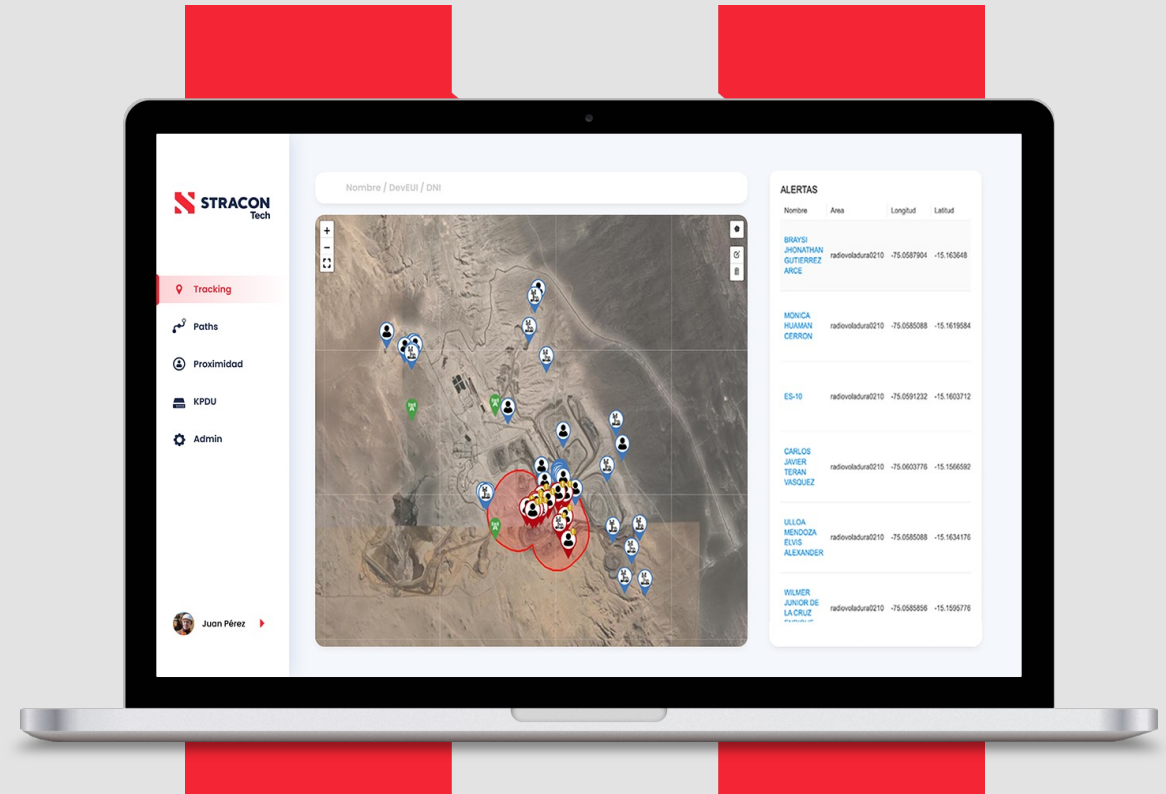

## SUMMARY OF THE SOLUTION

### The solution include:

- LoraWAN Network design
- ST-Track Platform
- TAGs: AbeeWay Smart Badges
- Field installation, start-up and configuration.
- Change Management: Post Implementation Support.

## NEXT STEPS PROXIMITY DETECTION

Battery Reports of the Tags.

Historical record of incidents between vehicles.

Historical record of incidents between vehicles and people.

## TESTIMONIES

"I would like to attest that STRACON Technologies has been awarded the People Tracking project in September 2022.

The scope of the solution is a LoRA communication network where smart Tags/Fotocheck transmit location and movement signals. The solution has an intelligent SaaS platform where several functionalities are embedded, among them polygons or exclusion areas for the blasting zone where only authorized people can be. The solution was successfully delivered and is in white run with expected results, once confirmed we would be expanding the coverage and usage, besides adding the connection of different Lora WAN sensors to perform Telemetry measurements."

**Marco Yacarini**  
IT Superintendent - **Marcobre**

## HOMOLOGATION

*Our product complies with all regulations and requirements and is approved by the MTC.*

# NCL's 'Suraksha Kavach' for Enhanced Worker Safety in Indian Coal Mines

Syook

Activity

Abeeway

Real time sensor data

Proactive intervention with real time alerts

The screenshot shows the Syook InSite interface. At the top, there are navigation tabs for Map, Dashboard, Reports, Admin, and Add-ons. A search bar is present. The main area is divided into a left sidebar for 'Assets' (Mine Employee) and a central map. The map displays various worker icons and sensor locations. On the right, there are detailed pop-up cards for three employees: Theodore Reyes (Employee code: C1747017, Shift: A, Location: Assembly line, Manufacturing Unit), Dennis Hessel (Employee code: C1347017, Shift: C, Location: Store, Manufacturing Unit), and Grady Tillman (Employee code: C1364317, Shift: C, Location: Main Road, Manufacturing Unit). Each card includes a 'Logout' and 'Details' button. A red alert bell icon is visible on the map, and a pop-up card for Vedvrath R (Employee Code: C1238910, Shift: B, Location: 240Dumper 1866-SECL-Dipka) is also shown.

Continuous improvement with analytics

Automated emergency response

Improve Safety

Enhance Productivity

Supercharge Compliance

# Coal Mine Sites- NCL & SECL

# Coal Mine Sites- NCL & SECL

**Jayant Mine, NCL**

# Business Challenges

No real-time visibility of workers & HEMMs

Lack of effective system to ensure worker safety

Prolonged man-machine allocation at the start of every shift

No location data to reduce response time of emergency incidents

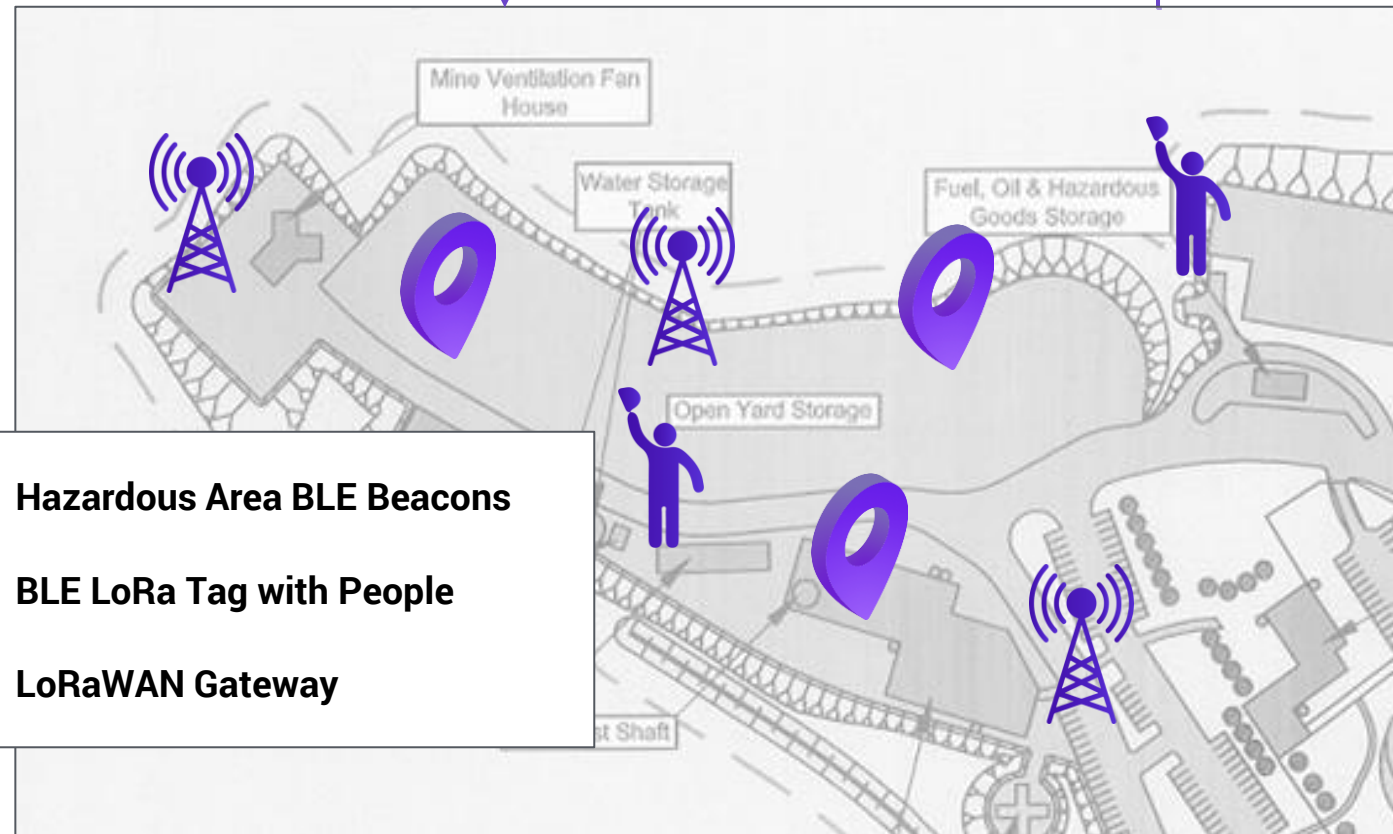

No real-time alerts on blasting zone/hazardous zone at the worker level

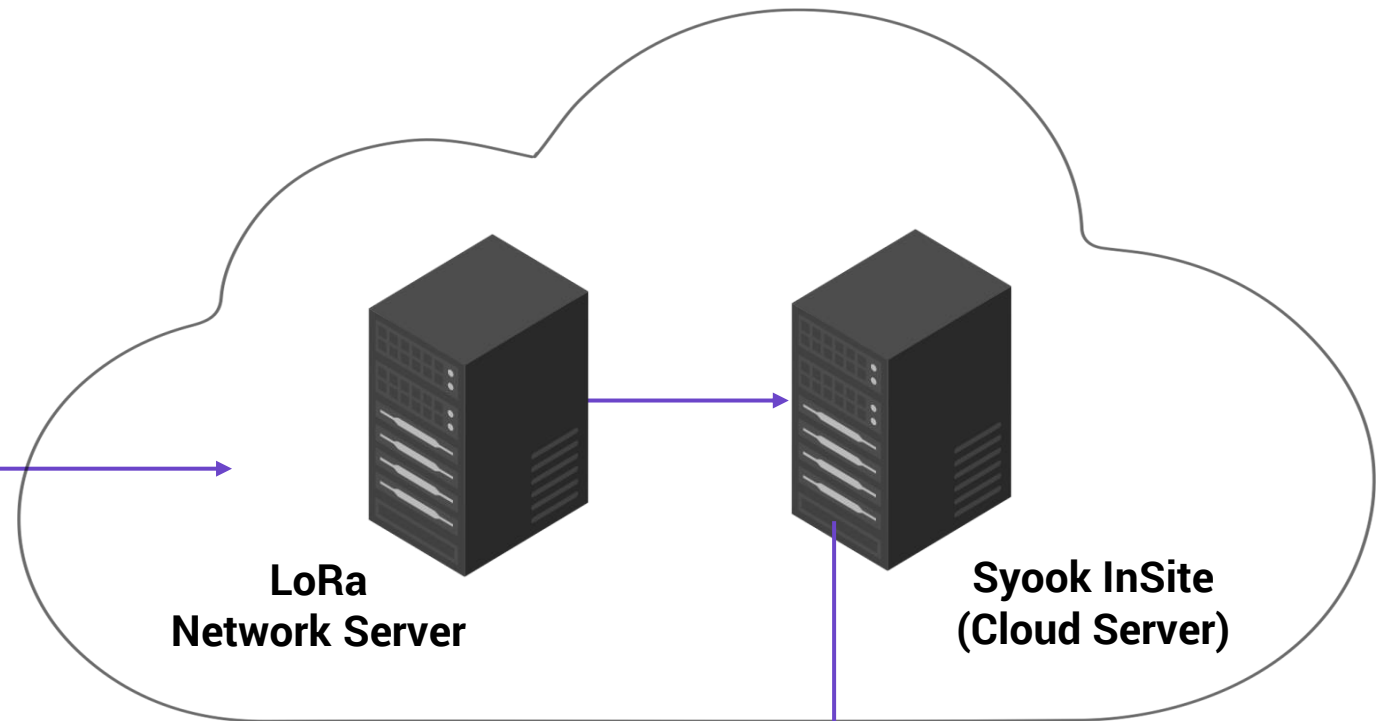

# Solution Overview

4G/Internet

Internet

# Solution Hardware

## LoRaWAN Gateways

- **Carrier grade casing (IP67)**
- Easy installation mounting
- Backhaul connectivity: 4G Worldwide module with 3G/2G fallback and ethernet (RJ45)

## Suraksha Kavach for operators

- **High-Pressure water-spray resistant enclosure (IP65)**
- Magnetic USB connector for Rechargeable battery
- 96 dBa buzzer, bicolor LEDs, SoS button
- Battery life: upto 3 weeks

## BLE Location beacons

- **IP65 Waterproof & Dustproof**
- Replaceable coin battery 1000mAh
- Up to 18 months battery life, 6 years overall lifecycle
- 50 meters detection range

# Deployed Hardware

LoRaWAN gateways strategically installed across coal mines.

**HEMM**

# Tag Distribution

# Tag Distribution Awareness

Syook

आओ, **सुरक्षा कवच** पहने और खुद को और अपने सहकारीयों का जीवन सुरक्षित करे।

मोबाईल नेटवर्कना होने पर आपातकालीन स्थिती में अपने सुपरवाइजर को संकेत दीजिए।

ड्युटी पर सुरक्षा कवच पहनिए, खुद को और अपने सहकारीयों को प्रतीबंधित जगह जाने से बचाइये।

आपातकालीन बटन का उपयोग करके लोगों को सहायता मांगने के लिए सूचति करके त्वरित सहायता प्राप्त कर

यह आपातकालीन स्थिती में लोगों को तेज़ी से सुरक्षा तक पहुँचने में मदत कर सकता ह

सुरक्षा कवच बता सकता है कि क्या कोई कुछ मनिटों के लिए बिल्कुल भी नहीं चल रहा है, और फिर अपने सुपरवाइजर और आस-पास के लोगों को अलर्ट भेजता है

सभी की सुरक्षा के लिए यह बहुत जरूरी है कि कोई भी उस क्षेत्र में प्रवेश न करे जहां विस्फोट हो रहा हो, लेकिन अगर कोई इस क्षेत्र में प्रवेश करता है, तो पर्यवक्षक को तुरंत सतर्क कर दिया जाता है

## सुरक्षा कवच

आपकी सुरक्षा, हमारी जिम्मेदारी

1

जरूरत पड़ने पर SOS से सहायता

2

मदद मांगने वाले व्यक्ति का स्थान पता लगाना

3

स्थिरता का पता लगाना

4

विस्फोट के दौरान सुरक्षा

# Digital Map

The screenshot displays the Syook InSite web application interface. At the top, the browser shows the URL 'https://'. The application header includes the 'PROJECT DIGICORAL' logo and navigation tabs for 'Map', 'Dashboard', 'Reports', 'Admin', 'Owner', 'Add-ons', and 'Sitemap'. A notification bell icon indicates 'Alerts 9+' and another shows '99+'.

The main map area shows a satellite view of a mining site with numerous colored markers (red, orange, green, blue) representing worker locations. Each marker has a small icon and a number. A sidebar on the left contains a search bar and a list of worker entities:

Entities	Clusters
▶ Khadia Worker	23 / 1322
▶ Jayant Worker	11 / 2687
▶ Nigahi Worker	26 / 2101
▶ Dudhichua Worker	3 / 1870

The map interface includes standard controls for zooming in (+), zooming out (-), and full-screen view (⊞), as well as a layer management icon (≡) in the bottom right corner.

# Connected Worker Safety

**Real-time location:** Faster search of personnel within the campus

**Work-hour monitoring:** Productive and unproductive area monitoring

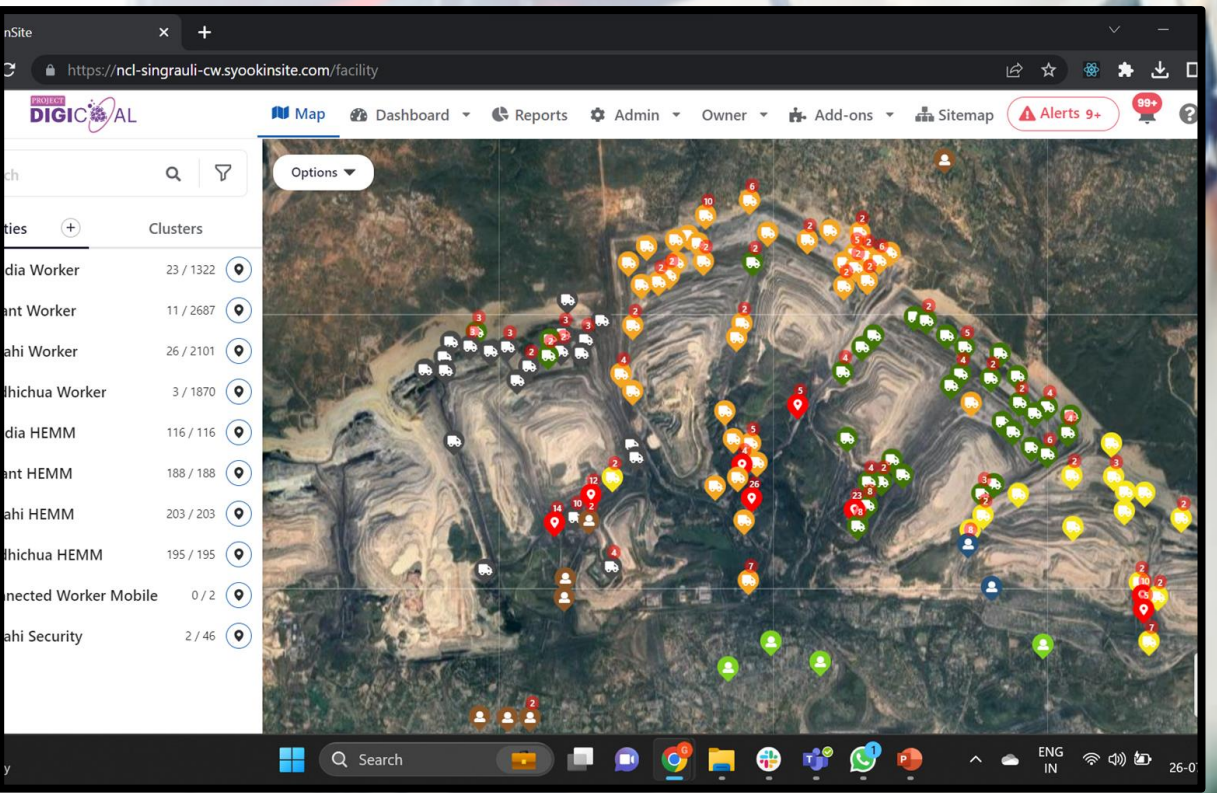

**Security monitoring:** Authorised areas are uniquely marked for every worker and alarm raised when violated

**Smart Attendance:** Generate automated attendance reports based on detection of workers in the facility

**Worker safety:** SoS can be raised by worker through tags. Fall can be detected automatically by the platform

# Auto Man-Machine Allocation

Name	Certified ET	Certified ES	Presence	Assigned Machine
Shyam Lal	Dumper	50MT	Reported	HEMM25163
Ramesh	Dozer	100MT	Not reported	

Machine ID	Equipment Type	Equipment size	Status	Actions
HEMM32537	Dumper	50MT	Available	
HEMM25163	Dozer	100MT	Assigned	

**Faster allocations:** Significant time reduction in the allocation of the available machines to present workers at the start of the shift, from 45 mins to under 15 mins

# Integrations

## **HEMM GPS Location & Availability:**

We have integrated with SAP for the GPS Locations & machine availability through APIs

## **Emergency & Compliance alerts:**

Our platform is sending real-time alerts to Third Party SW (Centralised War Room) for quick action

# CIL Achievements

The screenshot shows a web browser window displaying a news article on the PSUWATCH website. The browser's address bar shows the URL: <https://psuwatch.com/newsupdates/secl-registers-44-growth-in-coal-production-in-july-2023>. The website header features the PSUWATCH logo with the tagline "Fast | Accurate | Engaging" and social media icons for Facebook, LinkedIn, X, and YouTube. The navigation menu includes "News Updates", "PSU Watch", "Defence News", "Policy Watch", "हिन्दी न्यूज़", "Jobs Watch", "Interviews", and "Event N". The main headline of the article is "SECL registers 44% growth in coal production in July 2023". Below the headline is a sub-headline: "Apart from registering 44 percent growth in coal production, Bilaspur-based coal miner has recorded its highest-ever coal dispatch in the month, since inception". The article is accompanied by a large photograph of a coal mining and processing site, showing extensive coal stockpiles and industrial infrastructure in a hilly, green landscape.

# Asset Tracking in Hazardous Environments with Abeeway's ATEX/IECEx-Certified Trackers

Rohit Gupta

# A versatile catalogue of trackers to match a wide variety of vertical applications

## Industrial tracker

Large battery, hardened casing, high-precision tracking : designed to last *IP65, 19Ah type D battery.*  
*Up to 3 years battery life in motion tracking mode at 120 position per day.*

## Compact tracker

Solid and lightweight, built for heavy-duty tracking.  
*Asset tracking and management, even in the harshest environments.*  
*3xAAA 2.7Ah replaceable batteries, IP 68, ATEX/IECEX Zone 0/2 certified, temperature & motion sensors*  
*Up to 4 years battery life in LP GPS at 24 fix per day.*

## Micro tracker

Light, handy, yet powerful. Enables you to track and protect things (or people and pets) of value.  
*IP65, 450mAh rechargeable battery*  
*Buzzer, multimode button.*

### Battery life :

- Proximity mode : 5 days to 2 weeks depending on data precision
- Location mode : 90 days battery life at 40 fix per day with indoor/outdoor positioning.

## Smart Badge

Sleek, smart, and multi-functional.  
ideal for worker protection and zone alerts  
*IP65, ATEX Zone 2 certified, Zone 1 certification (in progress) Buzzer with 70dB high volume, industrialized magnetic connector, 1300mAh rechargeable battery, multimode button.*

### Battery life :

- Proximity mode : 1 to 2 months depending on data precision
- Location mode : 120 days battery life at 60 fix per day with indoor/outdoor positioning.
